## DETAILED ACTION

### *Application Status*

1. In response to a previous Office action (Paper No. 5 PCT/DO/EO/916), Applicants filed an amendment to comply with the sequence rules. Claims 1-23 are pending in the instant application.

### *Restriction*

2. Restriction is required under 35 U.S.C. § 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-22, drawn to methods for screening modulators of calcineurin interacting with superoxide dismutase.

Group II, claim(s) 23, drawn to kits comprising calcineurin and superoxide dismutase or vectors of each.

3. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons.

“A group of inventions is considered linked to form a single general inventive concept where there is a technical relationship among the inventions that involved at least one common

Art Unit: 1652

or corresponding special technical feature. The expression special technical features is defined as meaning those technical features that define the contribution which each claimed inventions, considered as a whole, makes over the prior art." (see M.P.E.P. § 1893.03(d))

Since the first claimed invention, Claim 1, lacks a special technical feature by virtue of its anticipation in the prior art (see PCT/ISA/210), it cannot share a special technical feature with the product claim, Claim 23. Thus, Claims 1-22, all related method claims, lack unity with Claim 23, a product claim useful for the method.

#### *Election*

4. A telephone call was made to Todd Juneau on August 8, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

#### *Conclusion*

5. A complete response to the instant Office action must include an election of invention to be examined.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kathleen M Kerr whose telephone number is (703) 305-1229. The examiner can normally be reached on Monday through Friday, from 8:30am to 5pm.
